According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadus S2 V220 00

Version	Revision Date:	SDS Number:	Date of last issue: 12.01.2022
3.6	23.09.2022	800001006652	Print Date 24.09.2022

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Trade name	: Shell Gadus S2 V220 00
Product code	: 001D8449

1.2 Relevant identified uses of the substance or mixture and uses advised against

Use of the Sub- stance/Mixture	: Automotive and industrial grease.
Uses advised against	: This product must not be used in applications other than those listed in Section 1 without first seeking the advice of the sup- plier.

1.3 Details of the supplier of the safety data sheet

Manufacturer/Supplier	: Triska Energy 24, THE HYDE BUILDING, THE PARK CARRICKMINES Dublin 18 Ireland
Telephone	: +353 (0)1 2958972
Telefax	: +353 (0)1 2959028
Contact for Safety Data Sheet	: INFO@TRISKA.IE

1.4 Emergency telephone number

: +44 (0) 151 350 4595 (This telephone number is available 24 hours per day, 7 days per week.)

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Based on available data this substance / mixture does not meet the classification criteria.

2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms Signal word	:	No Hazard Symbol required No signal word
Hazard statements	:	PHYSICAL HAZARDS: Not classified as a physical hazard according to CLP

According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadus S2 V220 00

Version 3.6	Revision Date: 23.09.2022	SDS Number: 800001006652	Date of last issue: 12.01.2022 Print Date 24.09.2022
		Not class ENVIRO	I HAZARDS: sified as a health hazard under CLP criteria. NMENTAL HAZARDS: sified as environmental hazard according to
Prec	autionary statements	: Prevention: No preca	autionary phrases.
		Response:	
		No preca	autionary phrases.
		Storage:	
		No preca	autionary phrases.
		Disposal:	
		No preca	autionary phrases.
Safe	ty data sheet available o	on request.	
Sensitising components : Contains alkyl thiadiazole. Contains Bismuth Naphthenate. Contains naphthenic acid. Contains Zinc Naphthenate May produce an allergic reaction.		ith Naphthenate. henic acid. Iaphthenate	

2.3 Other hazards

This mixture does not contain any REACH registered substances that are assessed to be a PBT or a vPvB.

Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.

Used grease may contain harmful impurities.

High-pressure injection under the skin may cause serious damage including local necrosis. Not classified as flammable but will burn.

SECTION 3: Composition/information on ingredients

3.2 Mixtures

Chemical nature	 A lubricating grease containing highly-refined mineral oils and additives. The highly refined mineral oil contains <3% (w/w) DMSO-extract, according to IP346. Classification based on DMSO extract content < 3% (Regulation (EC) 1272/2008, Annex VI, Part 3, Note L).

For explanation of abbreviations see section 16.

SECTION 4: First aid measures

4.1 Description of first aid measured	ires	
Protection of first-aiders		When administering first aid, ensure that you are wearing the appropriate personal protective equipment according to the incident, injury and surroundings.
If inhaled		No treatment necessary under normal conditions of use. If symptoms persist, obtain medical advice.
In case of skin contact		Remove contaminated clothing. Flush exposed area with wa- ter and follow by washing with soap if available. If persistent irritation occurs, obtain medical attention.
		When using high pressure equipment, injection of product under the skin can occur. If high pressure injuries occur, the casualty should be sent immediately to a hospital. Do not wait for symptoms to develop. Obtain medical attention even in the absence of apparent wounds.
In case of eye contact		Flush eye with copious quantities of water. Remove contact lenses, if present and easy to do. Continue rinsing. If persistent irritation occurs, obtain medical attention.
If swallowed		In general no treatment is necessary unless large quantities are swallowed, however, get medical advice.

According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadus S2 V220 00

Version 3.6	Revision Date: 23.09.2022	SDS Number: 800001006652	Date of last issue: 12.01.2022 Print Date 24.09.2022

Treat	ment	vention and por age and loss of Because entry ousness of the determine the e anaesthetics or can contribute surgical decom eign material sl	atically. njection injuries require prompt surgical inter- ssibly steroid therapy, to minimise tissue dam-

SECTION 5: Firefighting measures

5.1 Extinguishing media		
Suitable extinguishing media	:	Foam, water spray or fog. Dry chemical powder, carbon diox- ide, sand or earth may be used for small fires only.
Unsuitable extinguishing media	:	Do not use water in a jet.
5.2 Special hazards arising from	n the	e substance or mixture
Specific hazards during fire- fighting	:	Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates and gases (smoke). Carbon monoxide may be evolved if incomplete combustion occurs. Unidentified organic and inorganic compounds.
5.3 Advice for firefighters		
Special protective equipment for firefighters	:	Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to relevant Standards (e.g. Europe: EN469).
Specific extinguishing meth-	:	Use extinguishing measures that are appropriate to local cir-

ods		cumstances ar	nd the surrounding environment.
SECTIO	N 6: Accidental relea	ase measures	
6.1 Perso	nal precautions, prote	ective equipment an	d emergency procedures
Perso	onal precautions	Avoid contact 6.1.2 For emer	emergency personnel: with skin and eyes. gency responders: with skin and eyes.
6.2 Enviro	onmental precautions		
Envir	onmental precautions	nation. Preven	te containment to avoid environmental contami- t from spreading or entering drains, ditches or sand, earth, or other appropriate barriers.
6.3 Metho	ods and material for c	ontainment and clea	aning up
			produing or optoring into draing, ditabas or riv

Methods for cleaning up	:	Prevent from spreading or entering into drains, ditches or riv-
		ers by using sand, earth, or other appropriate barriers.

6.4 Reference to other sections

For guidance on selection of personal protective equipment see Section 8 of this Safety Data Sheet., For guidance on disposal of spilled material see Section 13 of this Safety Data Sheet.

SECTION 7: Handling and storage

7.1 Precautions for safe handling Technical measures :	Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols. Use the information in this data sheet as input to a risk as- sessment of local circumstances to help determine appropri- ate controls for safe handling, storage and disposal of this material.
Advice on safe handling :	Avoid prolonged or repeated contact with skin. Avoid inhaling vapour and/or mists. When handling product in drums, safety footwear should be worn and proper handling equipment should be used. Properly dispose of any contaminated rags or cleaning mate- rials in order to prevent fires.

7.2 Conditions for safe storage, including any incompatibilities

Further information on stor-	:	Keep container tightly closed and in a cool, well-ventilated
age stability		place.
		Use properly labeled and closable containers.
		Store at ambient temperature.

Refer to section 15 for any additional specific legislation cov-

According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadus S2 V220 00

Version 3.6	Revision Date: 23.09.2022	SDS Number: 800001006652	Date of last issue: 12.01.2022 Print Date 24.09.2022
Packa	iging material	: Suitable mate	kaging and storage of this product. rial: For containers or container linings, use mild density polyethylene. aterial: PVC.
Conta	iner Advice		containers should not be exposed to high tem- ause of possible risk of distortion.
•	ic end use(s) fic use(s)	: Not applicable	9

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational Exposure Limits

Components	CAS-No.	Value type (Form of exposure)	Control parameters	Basis
Oil mist, mineral	Not As- signed	OELV - 8 hrs (TWA) (inhalable fraction)	5 mg/m3	IE OEL
			ecific short-term exposure lim posure limit value should be	
Oil mist, mineral		TWA (inhalable fraction)	5 mg/m3	US. ACGIH Threshold Limit Values
Oil mist, mineral		TWA (inhalable fraction)	5 mg/m3	IE OEL

Biological occupational exposure limits

No biological limit allocated.

8.2 Exposure controls

Engineering measures

The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include:

Adequate ventilation to control airborne concentrations.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

General Information:

Define procedures for safe handling and maintenance of controls.

Educate and train workers in the hazards and control measures relevant to normal activities associated with this product.

Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.

Drain down system prior to equipment break-in or maintenance.

According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadus S2 V220 00

Version	Revision Date:	SDS Number:	Date of last issue: 12.01.2022
3.6	23.09.2022	800001006652	Print Date 24.09.2022

Retain drain downs in sealed storage pending disposal or subsequent recycle. Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

Due to the product's semi-solid consistency, generation of mists and dusts is unlikely to occur.

Personal protective equipment

The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

Eye protection :	If material is handled such that it could be splashed into eyes, protective eyewear is recommended. Approved to EU Standard EN166.	
Hand protection		
Remarks :	Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection. PVC, neoprene or nitrile rubber gloves Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended. For continuous contact we recommend gloves with break-through time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Glove thickness should be typically greater than 0.35 mm depending on the glove make and model.	
Skin and body protection :	Skin protection is not ordinarily required beyond standard work clothes. It is good practice to wear chemical resistant gloves.	
Respiratory protection :	No respiratory protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precau-

12.7 Other adverse effects

Product:	
Additional ecological infor- mation	: Does not have ozone depletion potential, photochemical ozone crea- tion potential or global warming potential. Product is a mixture of non-volatile components, which will not be released to air in any significant quantities under normal conditions of use.
	Poorly soluble mixture. Causes physical fouling of aquatic organisms.
	Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).
	Mineral oil does not cause chronic toxicity to aquatic organisms at concentrations less than 1 mg/l.

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product :	Recover or recycle if possible. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with applicable regulations. Waste product should not be allowed to contaminate soil or ground water, or be disposed of into the environment. Do not dispose into the environment, in drains or in water courses Do not dispose of tank water bottoms by allowing them to drain into the ground. This will result in soil and groundwater contamination. Waste arising from a spillage or tank cleaning should be disposed of in accordance with prevailing regulations, preferably to a recognised collector or contractor. The competence of the collector or contractor should be displayed beforehand.
	MARPOL - see International Convention for the Prevention of Pollution from Ships (MARPOL 73/78) which provides technical aspects at controlling pollutions from ships.
Contaminated packaging :	Dispose in accordance with prevailing regulations, preferably to a recognized collector or contractor. The competence of the collector or contractor should be established beforehand. Disposal should be in accordance with applicable regional, national, and local laws and regulations.
Local legislation

14.6 Special precautions for user

Remarks

Special Precautions: Refer to Section 7, Handling & Storage, for special precautions which a user needs to be aware of or needs to comply with in connection with transport.

14.7 Maritime transport in bulk according to IMO instruments

MARPOL Annex 1 rules apply for bulk shipments by sea.

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

REACH - List of substances subject to authorisation (Annex XIV) : Product is not subject to Authorisation under REACH.

Volatile organic compounds : Volatile organic compounds (VOC) content: 0 %

Other regulations:

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

The Safety, Health and Welfare at Work Acts 2005 & 2010. Chemicals Act 2008 & 2010. Carriage of Dangerous Goods by Road Regulations 2010.

The components of this product are reported in the following inventories:

REACH	:	Not established.

TSCA : All components listed.

15.2 Chemical safety assessment

No Chemical Safety Assessment has been carried out for this substance/mixture by the supplier.

SECTION 16: Other information

Full text of H-Statements

H315 :	Causes skin irritation.
H317 :	May cause an allergic skin reaction.
H319 :	Causes serious eye irritation.
H332 :	Harmful if inhaled.
H411 :	Toxic to aquatic life with long lasting effects.
H413 :	May cause long lasting harmful effects to aquatic life.

According to EC No 1907/2006 as amended as at the date of this SDS

Shell Gadus S2 V220 00

Version 3.6	Revision Date: 23.09.2022		DS Number: 00001006652	Date of last issue: 12.01.2022 Print Date 24.09.2022	
	atic Chronic Irrit.	:	Long-term (chro Eye irritation	nic) aquatic hazard	
Skin Irrit. Skin Sens.		-	Skin irritation Skin sensitisation		
IE OEL		:	Ireland. List of Chemical Agents and Occupational Exposure Limit Values - Schedule 1		
IE OEL / TWA : IE OEL / OELV - 8 hrs (TWA) :			Time weighted average Occupational exposure limit value (8-hour reference period)		

ADN - European Agreement concerning the International Carriage of Dangerous Goods by Inland Waterways; ADR - Agreement concerning the International Carriage of Dangerous Goods by Road; AIIC - Australian Inventory of Industrial Chemicals; ASTM - American Society for the Testing of Materials; bw - Body weight; CLP - Classification Labelling Packaging Regulation; Regulation (EC) No 1272/2008; CMR - Carcinogen, Mutagen or Reproductive Toxicant; DIN - Standard of the German Institute for Standardisation; DSL - Domestic Substances List (Canada); ECHA -European Chemicals Agency; EC-Number - European Community number; ECx - Concentration associated with x% response; ELx - Loading rate associated with x% response; EmS - Emergency Schedule; ENCS - Existing and New Chemical Substances (Japan); ErCx - Concentration associated with x% growth rate response; GHS - Globally Harmonized System; GLP - Good Laboratory Practice; IARC - International Agency for Research on Cancer; IATA - International Air Transport Association; IBC - International Code for the Construction and Equipment of Ships carrying Dangerous Chemicals in Bulk; IC50 - Half maximal inhibitory concentration; ICAO - International Civil Aviation Organization; IECSC - Inventory of Existing Chemical Substances in China; IMDG - International Maritime Dangerous Goods; IMO - International Maritime Organization; ISHL - Industrial Safety and Health Law (Japan); ISO - International Organisation for Standardization; KECI - Korea Existing Chemicals Inventory; LC50 - Lethal Concentration to 50 % of a test population; LD50 - Lethal Dose to 50% of a test population (Median Lethal Dose); MARPOL - International Convention for the Prevention of Pollution from Ships; n.o.s. - Not Otherwise Specified; NO(A)EC - No Observed (Adverse) Effect Concentration; NO(A)EL - No Observed (Adverse) Effect Level; NOELR - No Observable Effect Loading Rate; NZIoC - New Zealand Inventory of Chemicals; OECD - Organization for Economic Co-operation and Development; OPPTS - Office of Chemical Safety and Pollution Prevention; PBT - Persistent, Bioaccumulative and Toxic substance; PICCS - Philippines Inventory of Chemicals and Chemical Substances; (Q)SAR - (Quantitative) Structure Activity Relationship; REACH - Regulation (EC) No 1907/2006 of the European Parliament and of the Council concerning the Registration, Evaluation, Authorisation and Restriction of Chemicals; RID - Regulations concerning the International Carriage of Dangerous Goods by Rail; SADT - Self-Accelerating Decomposition Temperature; SDS - Safety Data Sheet; SVHC - Substance of Very High Concern; TCSI - Taiwan Chemical Substance Inventory; TECI -Thailand Existing Chemicals Inventory; TRGS - Technical Rule for Hazardous Substances; TSCA - Toxic Substances Control Act (United States); UN - United Nations; vPvB - Very Persistent and Very Bioaccumulative

Further information

Other information

No Exposure Scenario annex is attached to this safety data sheet. It is a non-classified mixture containing hazardous substances as detailed in Section 3; relevant information from Exposure Scenarios for the hazardous substances contained have been integrated into the core sections 1-16 of this SDS.

A vertical bar (|) in the left margin indicates an amendment from the previous version.

According to EC No 1907/2006 as amended as at the date of this SDS
