FOR USE IN THROUGH-PENETRATION  
FIRESTOP SYSTEMS  
SEE UL FIRE RESISTANCE DIRECTORY (5N76)

**1a** Affix to studs  
**1a** Visser sur les poteaux des cloisons sèches  
**1a** Fijar a los montantes

**1b** Optional: attach directly to drywall.  
**1b** Optionnel: visser directement sur la cloison sèche.  
**1b** Opcional: conectar directamente a la tablaroca.

**1c** Optional: when Gangplates are stacked, overlap and affix through screw holes.  
**1c** Optionnel: lorsque les plaques sont empilées, les visser ensemble en les chevauchant via les trous prévus à cet effet.  
**1c** Opcional: cuando las placas se apilan, solape las placas y fijelas a través de los orificios de los tornillos.

**2a** Insert and affix sleeve within Gangplate opening.  
**2a** Introduire le manchon dans l'ouverture et serrer les vis de fixation.  
**2a** Insertar y fijar el manguito dentro de la abertura de la placa.

**2b** Optional: Cover unused/blank penetrations with Gangplate cap.  
**2b** Optionnel: Couvrir toute ouverture non utilisée à l'aide du bouchon prévu à cet effet.  
**2b** Opcional: Cubra las penetraciones no usadas con el tapón.

**3a** Mount gypsum board to overlap onto Gangplate, and fix both together with minimum 6(GP 16") respectively 8(GP 24") drywall screws on each side of the partition walls.  
**3a** Fixer la cloison sèche à cheval sur la plaque d'assemblage, et fixer la plaque d'assemblage à la cloison sèche à l'aide de minimum 6 (GP 16") respectivement 8 (GP 24") vis à plâtre de chaque côté de la cloison.  
**3a** Monte el panel de yeso de forma que quede sobrepuesto en la placa y fijelos con un mínimo de 6 (GP 16") o bien con 8 (GP 24") tornillos en cada lado de la partición.

**3b** Optional: With adjacent Gangplates, respect maximum opening sizes, and use min. 6 (GP 16") respectively 8 (GP 24") drywall screws per Gangplate on each side of the partition wall.  
**3b** Optionnel: Lorsque les plaques sont mises bout-à-bout, respecter les dimensions maximales des ouvertures, et utiliser minimum 6(GP 16") respectivement 8(GP 24") vis à plâtre par plaque, de chaque côté de la cloison.  
**3b** Opcional: Con placas adyacentes, respete los tamaños máximos de abertura, y use un mínimo de 6 (GP 16") o bien 8 (GP 24") tornillos por placa en cada lado de la partición.
